

Since our earliest times, Aztecs, Mayans, Celts, Ancient Egyptians and Native Americans have looked at the celestial bodies for earthly guidance and understanding. Through the contribution of centuries of astronomical genius, much progress has been made, yet we are still searching for answers to many mysteries of the universe. Today, we remain captivated by the stars. We invite you to develop and nourish your cosmic curiosity right in your back yard at McCarthy Observatory.

Welcome to the McCarthy Observatory

Kathleen Fischer Sundial

Our state-of-the-art observatory has been designed, built, and operated by volunteers. Funded by individual and community donations, it is open to all free of charge. The facility offers complete accessibility for the disabled, including a lift for wheel chair access, a flexible eyepiece extension, and professional American Sign Language interpreters provided upon advance request at our monthly outreach, Second Saturday Stars. We are proud and eager to share the wonders of the Universe with all of you.

Personal Enrichment Resources:

Astronomy book library

Scale model solar system exploration

JJMO newsletter, *Galactic Explorer*
(updated monthly on JJMO website)

Astrophotography

Extensive meteorite collection

North pollinator meadow

Southeast garden
